6-501.114 Exposed pipes above ice machine in basement. Install FRP panelling above ice machine that extends past the front of the ice machine to prevent contamination of ice by dirt and other debris. 8/2/2016

**Good Practice Violation(s):** 3

**Total Violations:** 3

**Notes:**

Reinspection 8/11/16:  
3-302.11

Ground beef being drained in a colander in the hand wash sink. Discontinue using the hand wash sink for any food prep. All food prep must be done in the sanitizer compartment of 3-compartment sink. A colander must be used to elevate food above flood level rim of sink and the sink must be sanitized in between uses. Hand wash sink is only for handwashing.

6-501.114

A metal sheet was placed above ice machine in basement however is placed above exposed pipes, not under. Install a sheet of material that is smooth and easily cleanable that covers the width of the ice machine and extends beyond the front of the ice machine to protect ice when ice is being scooped into a transport container. Sheet must be installed underneath all exposed pipes to avoid any contamination to the ice machine.

6-202.15

Back door has weather stripping on bottom of door however weather stripping is still needed on side of door as there is still a gap on the side of the door.

**NOTE:**  
Either remove unused fryer that is not under a hood or place fryer under hood. Any unused equipment should be removed from premises.
